

Secure Backup & Storage Service Datasheet

Take control of your valuable data with our Secure Backup & Storage Service. Always available, offsite storage, with full data encryption from the moment it leaves your system. Access from anywhere in the world, 24/7, and backed by our Freehand Guarantee.

Freehand Networks believes that your data is the lifeblood of your business. It should be controlled and protected, and above all it should be available when you need it, from wherever you need it. That's why we provide our Secure Backup & Storage Service to small businesses who need the same solutions for business continuity and disaster recovery as the large enterprises but can't afford the high cost of enterprise solutions.

Whether you want to back up the MS Office documents from your laptop to a central location for safe keeping, or you want to back up Gigabytes of critical client data for continuous protection against loss or downtime associated with data restoration. Freehand Networks can help you!

We support:

Key Benefits:

- Simple backup/restore for Windows/Mac/Unix
- Encryption of every file from the moment it leaves your system
- Map a drive letter in Windows for easy access to your offsite data
- Multi user access to files stored offsite
- HIPAA and Sarbanes-Oxley compliant
- Scalable to fit your business and priced to fit your budget
- Backed by Freehand Support and our Guarantee
